

SIEMENS

Intelligent Comfort

Siemens Compact – efficient and reliable

In co-operation with Dimplex AS

Siemens Compact – 2NC2

- High quality convector heater
- Electronic thermostat
- Plugable energy saver

Designed for domestic and commercial use. Safe, low surface temperature achieved by an ultra-efficient and unobtrusive design. All heaters are equipped with a double-pole On/Off switch and over-heat protection. Electronic thermostat accurate to within 0,5°C maintain a very stable room temperature. Nine models with ratings from 500W to

3000W. Built-in facility for temperature set-back of 5°C from selected setting when used in conjunction with a remote time switch (only available with A-models, for permanent connection). The compact 2NC2 range (including models with cord and plug) can be used with the 2NC9 712 Energy Saver.

Siemens Energy Saver – 2NC9 712

Energy saver for domestic use. Controlled by microprocessor, easy plugable to the heater. Three fixed setback programs, pushbutton for choice of program
